**FOR IMMEDIATE RELEASE:** October 24, 2008

## **PRO-X Control Cables™ for the Performance Racing Industry**

CONWAY, SC – With a long standing reputation for manufacturing quality products, Glendinning has just introduced its **Pro-X Control Cables™** for the performance racing industry.

For many years, Glendinning has manufactured and supplied control cables using "armored cored" technology – the best in the industry. Glendinning designed its new **Pro-X Control Cables™** for high-performance operation with minimum lost motion or resistant forces. High-quality construction and high-performance design makes the **Pro-X Control Cables™** the ideal choice for the high-performance racing industry.

"We offer control cables for every application imaginable," said VP of Sales John Glendinning. "We are extremely excited to introduce our **Pro-X Control Cables™** into new markets where high-end, high-quality, high-performance control cables are needed."
