

GLENDINNING RV-POWER CABLE

Is Your Power Cable Flexible . . . Even at Sub-Zero Temperatures?

If not, you have a “fair weather” cord. Perhaps you have even had to bring that dirty, bulky 50 amp power cable into your RV interior to thaw! Besides being impractical—it’s a mess! The *Glendinning RV - Power Cable*, constructed with UL Type SOW jacketing, is the most flexible RV power cable on the market. It has proven to remain flexible regardless of exterior weather conditions.

Check out the great features and benefits of owning a *Glendinning RV - Power Cable*.

- **The most flexible power cable on the market!**
- **Power indicator LED lets you know power is ON**
- **Large, molded, “Easy-Out” lever easily disconnects plug from campsite receptacle**
- **Tough molded polyurethane plug prevents cracking due to weather, temperature extremes or mishandling**
- **Round ground lug provides better contact and fits receptacles better**

Item #	Standard Cordsets
04139-LVR-36	36' RV Power cable 6/3 8/1
